~ **What to *INVEST* in SELF** ~

EARTH ~ 4 ~ Power

Power is unfolding within you; you may feel as if you are closing off the outside world, but recognize this as a strength, not a weakness; you have the power to shut the door when necessary, you also have the power to open it; if you think the key to opening the door is lost, look within your own heart to find it; you have high qualities of generosity; do not become a victim of avarice (greed) on the part of yourself or anyone else.

~ **What to *RELEASE* from SELF** ~

EARTH ~ 5 ~ Nadir

You are experiencing a sense of worry; you have helped to produce a reality in which your own deep Truths are denied; you experience a sense of alienation; you feel alone and on the outside; this is a time for introspection, a good time to recount your successes and examine the progress you have made; it is time to rearrange your life in such a way that your heart and spirit are rewarded; this is the essence of healing and making things right.

EARTH Father ~ The Spirit of Fertilization

There is a sense of joyous practicality reflected in the circumstances of daily life; you are experiencing a sense of "wealth" spiritually, emotionally, intellectually and physically; through self-knowledge, potential is mastered; vast "fields" have been tilled and prosperity has been the result; this is the right mode of working and living; persist in this way and you will continue to prosper.

The Earth Father is the strength, power and spirit of the Earth, the physical plane, and the epitome of material success. He is well-balanced, spiritually, emotionally and intellectually. This is because he is well acquainted with his deepest inner Self.

Through self-knowledge, he has mastered his potential: actualizing or materializing everything he wishes. With this tremendous capacity, he does not experience uncertainty or anxiety. He has the eternal steadiness and reliability of a mountain. He radiates accomplishment.

The Earth Father is in control of vast lands, symbolically or literally, which he cultivates in a masterful way. Using his great gift of stability, he brings about the best in that which he “touches.” There is an important secret in his wisdom. This is the key to his success: he studies the patterns of Nature and imitates Her in every way. That is the key to his material prosperity. He has learned that Nature will obey his every command if he works within Her Law.

He uses his “wealth” for purposes of true charity, to nurture the environment and all life therein. He never fails to aid the mass of humanity, however close to or distant from him. He sees himself as a citizen of the Universe. Thus, he places the sake of the Universe before the call to nationalism or imperialism. He understands very well that we all share the same spirit, we all drink the same water, we all breathe the same air, we all share the same Earth - and that Earth is growing ever smaller with the growth and development of the human race.

Earth Father knows when it is time to seed and nurture. That is why he is the Spirit of Fertilization. He is able to fertilize because, through internal balance, he has developed an excellent sense of timeliness. He knows when the seed will be lost. He knows when the seed will be received, nurtured and grow life. He conserves his energy and resources and concentrates on the timely application of principles.

His life is full of pleasure and it is this very pleasure which he proliferates. He is giving and affectionate. This is because spirit is at peace with and within his body. The home, which he has taken the responsibility for creating, is bountiful, beautiful and serene. His friends and his children - which are many more than his blood offspring - can always come to him in times of trouble. People and animals seek his wisdom. His counsel - wherein he uses the secret of nature - is very wise.

Since the Earth Father is so powerful within, he can be also very powerful without. If it crossed his mind, he could be a dangerous opponent. But that is not his priority. He knows that true empowerment is balance within. He knows he does not need to engage in battles. Strength is internal integrity. Internal integrity affects the Universe of its own accord.

Earth Father meditates upon the idea that the great and small mingle and are of one will. Heaven and Earth are in communion. Strength lies within, glad acceptance lies without. Because I am at the center of things, I understand that when grass is uprooted, soil comes up as well. From this balanced position, I can see ahead. Because all is clear, I can steer a fruitful middle course. Any eclipse will quickly pass (see I Ching: Hexagram 11: Peace).

KEY XII ~ *The Hanged Man*

It is time to retreat, withdraw and surrender to quietude; when the internal waters are stilled, you can see and hear your deep eternal self which is your own truth; through meditative contemplation, you will arrive at truth; your glorious nature is revealed when the clear waters of your mind cease to be disturbed by rippling thoughts; this is a time of voluntary withdrawal, reenter the world only when you know you have received answers; do not be pushed or agitated by the whims of others.
